Req ID	Type	Description	Priority	Acceptance Criteria	Rationale (short)	Comments
FR-001	Functional	The system shall allow donors to post surplus food packages with perishable expiry countdown timers and dietary tags.	High	Pass: Shelter reserves batch and receives pickup verification code. Fail: Expired food batch remains active on claim board.	Enables donors to list available surplus food safely.	
FR-002	Functional	The system shall allow verified shelters to view available surplus food batches and their expiry information.	High	Pass: Verified shelter can view active batches with expiry time. Fail: Expired or unavailable batches are shown as active.	Helps shelters find suitable food before expiry.	
FR-003	Functional	The system shall allow verified shelters to reserve an available food batch and select a pickup window.	High	Pass: Selected batch is reserved and pickup window is recorded. Fail: Two shelters can reserve the same batch.	Prevents duplicate reservations and organizes food pickup.	
FR-004	Functional	The system shall provide donors and shelters with a pickup verification code for a confirmed reservation.	Medium	Pass: A unique verification code is generated for each confirmed reservation. Fail: A confirmed reservation has	Confirms that the correct food batch is collected.	

				no verification code.		
FR-005	Functional	The system shall automatically remove food batches from the claim board after their expiry time.	High	Pass: Expired batches are no longer available for reservation. Fail: An expired batch can still be reserved.	Prevents distribution of expired food.	
NFR 001	Nonfunc.	The platform shall dispatch instant push notifications to shelters within a 5 km radius when high-quantity perishable food is listed.	High	Pass: Notifications reach eligible shelters within the specified target latency during peak-load testing. Fail: Notifications exceed the target latency.	Helps nearby shelters respond quickly to perishable food.	
NFR 002	Nonfunc.	The platform shall protect donor and shelter information using authenticated access.	High	Pass: Only authenticated users can access protected account and reservation information. Fail: An unauthenticated user can access protected information.	Protects user and reservation information.
